

Zeppelin gets awarded in Field Hospital Tender of Spanish Armed Forces

Together with their Spanish partner Tecosa (Siemens Spain) Zeppelin has been awarded in a Mobile Field Hospital Tender issued by the Spanish Ministry of Defence.

The hospital is a turn-key project (see layout draft) that runs from 2007-2010. The total project value is EUR 27.000.000 (including VAT).

The Field Hospital is a combination of shelters, tents and supporting infrastructure. The whole hospital shall be prepared for the installation of a NBC protection system. This requires a special design of the units in terms of tightness and climatisation.

The Hospital fully complies with all relevant NATO and military standards. It will support NATO operations all over the world. As a specialist company in the supply of Mobile Field Hospitals, Zeppelin-Shelters are known for their superior and reliable quality for use under the utmost climatic conditions.
